Sunlite receives UL listing for its SunStar25 Extended Series

October 30, 2013

Sunlite Science & Technology passed UL testing for an LED interior and exterior wall sconce, wall mount, pendant, and chandelier.

LAWRENCE, KS, USA – Sunlite Science & Technology announces that its LED SunStar25 Extended Series is officially UL listed.

The new SunStar25 extended series is a continuation of the SunStar25 Can Light Replacement that was UL approved in November of 2012 and includes an LED interior and exterior wall sconce, a wall mounted fixture, a pendant, and a chandelier.

“With these additional products added to the SunStar25 series we are excited to be able to offer lights for every residential use. We have a light for practically everywhere,” said Fong Suo, Sunlite Science & Technology Engineer.

These lights are available in a 3 chip, 6 chip, and 7chip versions at 500 lumens, 600 lumens, and 660 lumens respectively. With a 5 year warranty and multiple choices in color temperature this series of fixtures brings price comparable and energy efficient LEDs to the residential and commercial markets.
