Sunlite graduates from the Bioscience & Technology Business Center

November 1, 2013

Sunlite Science & Technology graduates from the Bioscience & Technology Business Center and purchases 4811 Quail Crest Place

LAWRENCE, KS, USA – Sunlite Science & Technology has officially moved out of the Bioscience & Technology Business Center, where its offices were housed for 3 years, and out of 345 N Iowa Street, where it rented warehouse space for 16 years from PUR-O-ZONE, to a newly purchased warehouse and office space at 4811 Quail Crest Place.

By relocating both sets of current employees to an unoccupied + foreclosed on warehouse, Sunlite fills an existing vacancy on Quail Crest Place, increasing business occupancy along this road. Sunlite's expansion timing also leaves no density vacancies behind, with Pure-O-Zone set to expand into the rest of their warehouse and several companies ready to expand within the BTBC but not graduate out of it.

"Bringing office employees and warehouse employees together under one roof has simplified company communication logistics dramatically," said Patty Haller, Sunlite Science & Technology Customer Service Representative.

Sunlite Science & Technology looks forward to inviting all of Lawrence to an Open House and Ribbon Cutting once renovations are completed.
